

OUR PROGRAM

The North Texas Equestrian Center offers a weekly summer camp where children and teens can learn anywhere from the basics to the more advanced skills of English horseback riding. We are committed to providing a program that prides itself on quality, safety and fun.

All campers will be trained in the care of both horses and tack. Every rider will be assessed for their ability level the first day and will receive the appropriate instruction to further their abilities. There is careful supervision to allow for a safe learning environment. Our goal is to improve your riding ability, overall strength, balance and coordination.

Ultimately, we want to develop confident riders of superior ability by offering you top rate training from qualified individuals who take yours and your children's goals quite seriously. In the end we hope that you develop a passion that will last a lifetime.

OUR LESSONS

During our summer camps children ride in groups according to their abilities and rate of advancement. It is not uncommon for children to advance to a higher group during the courses for the week. Our number one priority is confidence in the tack. **OUR HORSES** We pride ourselves on having “real” horses. It is important that your child learn on horses that are healthy. Our school horses are in excellent condition and show ready at all times.

OTHER ACTIVITIES

A long day in the Texas heat can be very exhausting. We plan special activities throughout the day to keep spirits high and to just have fun. We play games and have scavenger hunts. The kids learn about different aspects of horse care and general knowledge every day, and we have special crafts planned for every afternoon.

END OF WEEK SHOW

At the end of every week we invite family and friends to join us for a demonstration ride by each rider in our camps. Don't forget your cameras! Afterwards we have an awards ceremony and say our farewells.

We also have a full service tack shop onsite for pants, boots, helmets, gloves and anything else you might need.
